

Q: Could you please provide a driver for Win98SE for the above product?

A: Unfortunately, software suppliers for this product no longer support Windows 98 as such we are unable to support this operating system with this product.

Q: I need the driver that is Vista compatible as I bought the item before I had my vista computer. Can you direct me to the right link as I was unable to find in your download link?

A: The drivers shipped with the Laser AO-USBBD are not Vista compatible. This product has been replaced by a later version the software can be downloaded from the following location:

[http://www.laserco.com.au/support/drivers/pcacc/AO-USBBD2/IVT\\_BlueSoleil\\_%202.6.0.8%20070517.ZIP](http://www.laserco.com.au/support/drivers/pcacc/AO-USBBD2/IVT_BlueSoleil_%202.6.0.8%20070517.ZIP)

Depending on the age of the dongle you have, this version may only work in demo mode.

The latest version of the software can be downloaded from the following location:

<http://www.bluesoleil.com>. Please note that updates to this software from the Bluesoleil website are not free updates.
