

Q: I am looking for a device to put in a sign that will repeat a number of videos through out the day. I was looking at the Laser MediaMate NT-MVL Media Player on your website. Since the sign will be turned off at the end of day I was wondering if it is possible to program the Laser MediaMate so when the sign is turned on the next day the Laser MediaMate will continue repeating the video files or will it just go back to the main menu.

A: Unfortunately, as the Laser Media Mate is designed for domestic use, the features you require are not possible with this product. When the Media mate is turned off it will start at the main menu when the unit is turned back on again.
