7. The progress of the conversion will be displayed in the Status field.
8. Copy the converted file to the player.

For more detailed instructions on this program, Press the "F" key to launch the help file.

Troubleshooting

No Power	Make sure you have switched the player on. And ensure that the battery is charged
No sound	Make sure volume is not on 0 position and the connection to earphone is valid. Please make sure the earphone is clean. Damaged MP3 files may appear to play but generate no sound
Strange characters on display	Make sure you have chosen the correct language
FM has bad performance	Change location to ensure good reception. Earphone must be connected. Switch off power appliance nearby
Cannot Download Music	Check USB cable, and make sure the player is properly connected to the PC. Check files are the correct format. Music files must be WMA or MP3 with no copy protection
Video files will not play	Ensure that video files have been converted prior to download to the player
